

# David Esquerra

## Full stack Web Developer

Github: [Davidfree2](#)

Email: [DavidEsquerra.de@gmail.com](mailto:DavidEsquerra.de@gmail.com)

Website: <http://davidesquerra.com/>

### How I can add value:

I can add value through my previous experience developing FullStack Web projects from scratch. I've hosted multiple websites and services through AWS platforms. I'm a strong learner who has learned tons of different frameworks and programming languages. Great troubleshooter and team member through previous experience.

### Experience:

#### [Davidesquerra.com:](#)

Built and hosted from scratch from design to implementation. Used agile methodology to create a successful website. Used svelte framework with nodeJS, Express, NodeMailer to complete project. Worked through AWS EC2 hosting standards to bring the project to life. Added a proper port to work with DNS. Continues improvement and updates to Websites with version control Git and Github.

#### [Contacts Web App:](#)

Started with brainstorming ideas and creating minimum viable product and design. Then proceeded to use agile methodology with React, NodeJS, Express, Cookies, Cookie Parser, MongoDB and Fetch API to bring the project to production with specific features. Continues development with git and github. AWS EC2 hosted.

#### [Ka-Plink Search Engine:](#)

Created idea and layout. Decided to use proper technologies using React, React Router, FlexBox, AWS EC2, NodeJS, Express, Fetch API. Led Idea to final production with proper hosting.

### Languages:

Html, Css, Javascript, Python, JSON, PostgreSQL, MongoDB

### FrameWorks:

NodeJS, Express, ElectronJS, Svelte, React, NodeMailer

### Operating Systems:

Linux, Ubuntu, Windows, Raspbian, Kali linux.

### Hosting Platforms:

AWS

### Version Control:

Git, Github

There are many more projects i've built of this size and you can check them out here
